

Accuride Aluminum Wheels

Standard Polish on Every Aluminum Wheel

Superior Finish

For fleets that specify aluminum wheels to balance the needs of performance and weight, aesthetics are a critical aspect of fleet image. Even the simplicity of a higher gloss rated aluminum wheel can impact driver morale and retention. Accuride recognizes this critical aspect for fleets and therefore manufactures all of their aluminum wheels with a base Standard Polish (SP). Our SP wheels far exceed the look of tradition brush/machine finished wheels, which can appear rough, dull, and have a non-uniform appearance. For the best value with a great look, specify Accuride Standard Polish aluminum wheels.

SPECIFICATIONS

Wheel Size	Part Number	Bolt Holes	Bolt Circle (mm)	Center Bore (mm)	Offset (mm)	Weight (kg)	Max Load (lbs)	Max Inflation (bar)
22.5 x 8.25	29560	10	335	281	170	23.6	3650	9.5
22.5 x 9.00	29562	10	335	281	175	24.6	4125	9.7
22.5 x 11.75	40164	10	335	220	120*	24.8	5000	9.5

*Inset (mm)

Accuride SP

- Standard Polish (SP) process polishes the full surface of the wheel.
- No extra charge for inside or outside polish.
- Reduces inventory levels.
- Best value with a great look.
